DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Spillman, Jr. (4863270).

Spillman, Jr. discloses (see fig. 3 below), as in claims 1-20, an optical sensor with inherent claimed method for measuring a physical property of a strand comprising:

- (a) a light source (42) for emitting light onto the strand (44);
- (b) a pixel array (48) having a plurality of pixels facing the light source, the array and light source defining an area there between for positioning the strand whereby an image of the strand is captured on the array by generating an output value at each of the pixels relative to an intensity of light received at each of the pixels from the light source; and
- (c) a signal processor (52) for receiving and processing the output value for each of the pixels to extract a particular property of the strand.

FIG. 3

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Belleville et al. (5202939) is cited for disclosing an optical sensing device and the method thereof for measuring a physical parameter.
